

# Spinning Light Wand Toy Adaptation

## USER QUICK GUIDE (FOR V1.1 PRINTED BASE)

### Introduction

The Switch Adapted Spinning Light Wand toy provides a way to activate and hold the toy for users who may otherwise have difficulty playing with it independently.

### Features

### Usage

An assistive switch with a 3.5 mm mono plug is connected to the Switch input port on the Base. When the switch is activated, the lights will turn on and spin within the plastic globe.

### Compatibility

This adapted toy is compatible with assistive switches that have a 3.5 mm plug.

### Cleaning

The 3D printed base can be wiped down with a cloth. Do not submerge.
